Meraki API – Change SSID with PHP

By Lasse Bang / May 29, 2017 / Meraki API

Hi,

Here is a example on how to change the SSID with Meraki API and PHP.

```
1  <?php
2  //API KEY
3  $apikey = 'API KEY HERE';
4  //THE NUMBER OF THE SSID YOU WANT TO CHANGE, the first have the nr
5  $ssid_number = 'SSID NUMBER';
6  //NETWORK NUMBER, example L_9837438944354469994
7  $network = 'NETWORK NUMBER';
8  //ENTER NEW SSID NAME HERE
9  $ssid = 'NEW SSID NAME';
10
11  $url = "https://dashboard.meraki.com/api/v0//networks/". $network.'
12
13  $hdr = array();
14  $hdr[] = 'Content-Type: application/json';
15  $hdr[] = 'X-Cisco-Meraki-API-Key: '.$apikey;
16
17  $curl = curl_init($url);
18
19  $data = array("name" => $ssid);
20
21  $json = json_encode($data);
22  curl_setopt($curl, CURLOPT_CUSTOMREQUEST, "PUT");
23  curl_setopt($curl, CURLOPT_HEADER, false);
24  curl_setopt($curl, CURLOPT_RETURNTRANSFER, true);
25  curl_setopt($curl, CURLOPT_HTTPHEADER, $hdr);
26  curl_setopt($curl, CURLOPT_POSTFIELDS, $json);
27  curl_setopt($curl, CURLOPT_FOLLOWLOCATION, true);
28
29  // Make the REST call, returning the result
30  $response = curl_exec($curl);
31  if (!$response) {
32      die("Connection Failure.n");
33  }
34  ?>
```
